

## Caithness™

The Caithness™ is the very latest premium alternating replacement system within the range. This product has been specially designed for use in frail, elderly and paediatric patients. The unique smooth coated cells, with smaller size and volume, allows multiple application in upright seating positions. The clever 27 cell system ensures adequate support when profiled and as such is useful for nursing pulmonary conditions, who often require high pillow and back rest elevation positions. Complete with a simple to use, high quality digital pump and specialist polyurethane cover. This product is targeted towards the assistive treatment for patients who have existing and potentially severe pressure damage, up to and including Category 4 ulcers.

If you have any questions we are here to help.
