

Care in motion

Automated pressure redistribution

Enhancing the users well-being

Supporting improved clinical outcomes

Toto[®] Cradle is an automated lateral turning system enabling prescribed lateral turning intervals, even when users are sleeping

With a powered control unit and a turning platform fitted beneath the users existing mattress, Toto Cradle automatically turns users at clinician-defined intervals from 30 minutes up to 4 hours, relieving pressure over their most vulnerable areas.

The new Toto Cradle is designed to offer enhanced comfort, support, and increased concordance

This system features a secondary tilt on the opposite side of the primary tilt, which work in parallel to cradle the user, providing enhanced comfort and support while minimising the risk of user migration across the support surface.

Automated pressure redistribution

Toto Cradle provides effective pressure redistribution aiding pressure ulcer prevention and management

Enhancing the users well-being

Toto Cradle is design to aid user well-being through supporting pressure area care management, preserving dignity, reducing pain experience compared to manual reposition, supporting end-of-life and palliative care, as well as greatly improving overall comfort and sleep quality.

Supporting improved clinical outcomes

Toto Cradle provides healthcare staff with peace of mind that the user is repositioned effectively a prescribed intervals whilst increasing their safety.
