General

Thank you for choosing an Etac product.

In order to avoid injury during handling and use, please read through this manual first.

In the manual, the user is the person sitting in the chair. The carer is the person helping the user.

Intended use:

The Swift Mobile 2 family is a range of mobile shower chairs and toilet chairs (hereafter called the product) intended for indoor use when performing hygiene tasks for people with restricted mobility. The product can be used in the shower, at a sink, or over the toilet, as well as for transfers to and from the hygiene room.

The product is intended for use in home environments and institutions.

The product is suitable for use in wet areas, but not pools or similar corrosive environments.

The product is intended to compensate for various types of injuries or disabilities that limit the mobility of the user.

The product is intended for adult users, generally persons who are at least 146 cm tall and who weigh at least 40 kg.

The product is not intended for any other use or environment beyond those stated above.

The product has been tested and complies with the requirements set out in EN ISO 10993-1 and SS EN 12182.

The product conforms to the requirements of the Medical Devices Regulation (EU) 2017/745.

Contra indications:

There are no known contraindications.

This symbol appears in the manual along with text. It indicates instances where the safety of the user or the assistant may be at risk.

The images which are referred to on each page are found at the start of the manual (pages 3 to 11). See Figures A to J for the corresponding text.

This product should be recycled as per national regulations.

Item list: ● = Applies to, ○ = Accessories

See the item list on the right which displays the information applicable to each product.

Technical data

See Figure C

● ● ● ● ●

Warranty / maintenance

See Figure D

● ● ● ● ●

5-year guarantee against material and manufacturing defects. For terms and conditions, see www.etac.com.

Service life 7 years. For complete information regarding the service life of the product, see www.etac.com.

- D1.** Clean the product with normal non-abrasive cleaning agents (pH value of between 5-9). Rinse and dry. Disinfect the product with an alcohol-based disinfectant, 70%. The product is otherwise maintenance-free.
- D2.** The product and its accessories can be safely cleaned at 85°C for 3 minutes (unless otherwise stated). This applies for reconditioning.

The product can be reconditioned. Refer to the reconditioning instructions at www.etac.com.

Constituent materials are resistant to common disinfectants.

The following surface treatment methods have been used to protect against corrosion:

- Lacquered surfaces = Polyester powder coating
- Non-lacquered steel surfaces = Fe/Zn-Ni

Reuse:

The product is suitable for reuse. The number of times it can be reused depends on how often and in which way the product is used. Before reuse, thoroughly clean and disinfect the product and check its safety features. If necessary, take remedial action.

Safety

See Figure E

● ● ● ● ●

- Defective chairs must not be used.

E6. Risk of crushing with arm supports.

E7. Do not use defective products.

E1. Make sure the castors are locked when users sit down on or get up from the chair.

- An anti-tip attachment must be used if the user is an amputee.

E2. Never stand on the foot supports as there is a risk of tipping!

E3. The sitting position has an impact on stability.

E4. Chair stability is improved if the castors point outward.

E5. See the maximum user weight for your commode chair in the table (page 5).

In case of an adverse event occurred in relation to use of the device, it should be reported to your local dealer and the national competent authority in a timely manner. The local dealer will forward information to the manufacturer.

English

Transfers

See Figure F

Over a threshold:

- F1. Chair only, put one foot on the wheel.
- F2. With user, pull the chair backwards.

In stationary position:

- F3. Always lock as many castors as possible when the chair is to be used in a stationary position.
- F4. Out-turned castors improve the chair's stability.

Transferring:

Assess the risks and take notes. You as a carer are responsible for the safety of the user. Aids should be used if the transfer is deemed as risky. Visit www.etac.com for manual transfer aids.

F3-F4. It is important to ensure that the castors are locked and pointing outward before carrying out transfers to and from Swift Mobil-2.

F5-F7. Fold up the arm support on the transfer side of the chair. Carry out the transfer.

Adjustment

See Figure G

Height:

- G1-G7. The height is easily adjusted by inserting the bolt in the required position. See distances in the technical data section.

Check that both sides have been adjusted to the same height as otherwise stability can be reduced. G7. Do not use the chair if the bolt (orange) is not locked.

Arm supports:

- G8. The height of the arm supports and/or width between the arm supports can be adjusted. Loosen the screws, twist the support to the desired position and retighten the screws. Then loosen and refit the arm support plate in the correct position. Swift Mobil Tilt-2 XL is delivered with the arm supports mounted in the most inward position (seat width 48 cm).

Tilt angle:

- G9. Fit the gas piston in position A to tilt the seat at angles from -5° to 30°
- G10. Fit the gas piston in position B to tilt the seat at angles from 0° to 35°

User brake:

- G11. When adjusting the brake, the brake pin should be set 18 to 22 mm from the rear wheel for good grip.

Leg support

See Figure H

- H1. The assistant can easily raise and swivel the leg supports to the side for the user to sit down in or get up out of the chair. The foot supports are detachable.

- H2. Various height adjustment options are available by moving the locking pin. The leg supports have 6 different height settings.

Tilt function

See Figure I

- I1. The assistant can adjust the sitting angle with ease by holding in the handle and tilting to the required position. Make sure that the wheels are locked if the tilt function is used when the user is sitting in the chair.
