

Safe Bariatric Patient Lifting at Home – Discover the Mangar Camel Cushion Solution

Caring for bariatric individuals comes with unique challenges—especially when it comes to safe moving and handling. Standard equipment often falls short, and manual lifting can pose serious risks for both the caregiver and the person being assisted.

The Right Tools Make All the Difference

That's why at EasyCare Systems, we recommend the **Camel Lifting Cushion by Mangar**—a reliable, dignified solution for lifting bariatric individuals safely from the floor. Designed to support up to 320kg (705lbs), it inflates smoothly to help someone sit upright without strain or injury.

Portable, Powerful, and Easy to Use

Whether at home or in a professional care setting, the Camel gives caregivers confidence and protects the person's comfort and safety during one of their most vulnerable moments.
