

Mackworth[®] Patient Turner

The **Mackworth[®] Patient Turner** is a practical tool for carers who need to help patients with lifting and turning movements from one seated position to another. This reduces the risk of stress injuries for the carers and provides a more secure transfer for the patient. Suitable for patients with a moderate degree of strength in their arms and legs, and the ability to stand up with support. Height adjustable knee pads and a non slip tread base provide a safe and comfortable transfer for the patient. The base wheels allow easy movement between patients. The turntable easily rotates a complete 360° for transfers in even the most confined spaces.

Features	Benefits
Weight limit of 30 stone /190kg (Advised to be used clinically at 150kg)	Suitable for a wide range of patient demographics
Lightweight unit (15kg)	For ease of transport / handling procedures
