# PAEDIATRIC FOLDABLE

## BATHING CRADLE

Designed to assist

Our Paediatric Folding In-Bath Cradle is designed to make bathing young children easy and stress-free. With its low profile design, the user sits further into the bath, allowing for deep submersion and less water use.

The folding function of the head, back, thigh and calf sections not only allows for the chair to be stored and transported with ease between uses, but also allows the carer to tailor the cradle to the most comfortable position for paediatric users.

The cradles come with a lap belt as standard as well as being secured with tension adjustable straps to the underside, head and foot of the cradle allowing for further adjustment and comfort.

### OPTIONAL ACCESSORIES

Washing Aperture

Side Support Rolls

Neck Roll

Delta Head Rest
