

Repose Wedge

Repose Wedge
Designed to completely
off-load heels

repose[®]

Repose® Wedge

The Repose Wedge is designed to completely off-load heels for either pressure damage prevention or as part of the management of heel ulcers.

Repose Wedge is suitable for patients:

- Assessed as being up to very high risk of developing heel pressure damage and / or with up to Category 4 pressure ulcer
- Who are confused and may not be able to remove other off-loading devices when moving off the bed
- Who are restless and therefore may not tolerate other forms of heel protection or kick them off
- With wider calves or suffer from foot drop making regular foot protector boots unsuitable
- On their sides or tilted and where there may be the possibility of pressure damage from an inflation valve

PU Strap

Repose Wedge is now available with a PU strap for easy cleaning and additional infection prevention.

Repose products protect patients at all levels of risk

- ✓ VERY HIGH RISK
- ✓ HIGH RISK
- ✓ AT RISK

Repose is indicated for the treatment of all categories of pressure ulcers

Multi-Patient Use Product
