

Ultracore Repose Lite Inside

An evolution in hybrid
mattress technology

Ultracore Repose® Lite Inside

Ultracore Repose Lite Inside is a pre-inflated, reactive air and high specification foam hybrid mattress.

Ultracore Repose Lite Inside is an immersive, reactive air, pre-inflated, foam hybrid mattress designed for the prevention and treatment of pressure ulcers as part of a pressure ulcer prevention programme.

Ultracore Repose Lite Inside combines three components to offer exceptional pressure redistribution properties.

1 Repose Lite Mattress Overlay

A pre-inflated reactive air, pressure redistribution and reduction support surface, with high levels of immersion and envelopment has been clinically proven to deliver statistically significant patient benefits.

2 Multi-stretch Cover

A multi-stretch polyurethane cover, that is moisture vapour permeable, water resistant and has a protective ingress zip cover.

3 Foam U-core

Designed to follow the contours of a profiling bed, the u-core structure provides extra stability and support to the mattress.

Repose protects patients at all levels of risk.

Repose is indicated for the treatment of all categories of pressure ulcers.

Ultracore Repose Lite Inside
Weight Limit 250kg

Description

Ultracore Repose Lite Inside

Foam Density/Hardness

Support Surface 33/160 Side Walls 39/200

Size (L/W/H)

L 1980mm x W 880mm x H150mm
